# **Thomas Winninger**

# Student at Télécom SudParis - ENS Paris-Saclay

Mail: thomas [dot] winninger [at] telecom-sudparis [dot] eu - LinkedIN: thomas-winninger

Website: <a href="https://le-magicien-quantique.github.io">https://le-magicien-quantique.github.io</a> - GitHub: <a href="https://le-magicien-quantique.github.io">Sckathach</a>

### Whoami?

Aka the quantum warlock, the masked camel, the fanOfThermodynamics, the whale orchestra conductor, or just **Sckathach**. I'm a french student at Télécom SudParis, and soon, an Al researcher!

Fond of mathematics and physics, I ended up at Télécom SudParis where I focused on cyber security. As I quickly became interested in AI security, I decided to take a gap year to bring myself up to speed on the subject: AI security research, interpretability, tools, statistics; and since that's what I like best, I'm now doing a master's degree in fundamental AI, and I plan to continue with a thesis, most likely in the same field.

#### Education

- 2025 2026 Master MVA ENS Paris-Saclay
   Topology, optimal transport, RL, training and deploying large-scale models, LLM, GNN, learning for protein science, convex optimization.
- 2022 2026 Engineering Degree Télécom SudParis
   Telecommunications, cyber security, cloud, information theory, probability, optimization, graph theory, GNN, signal processing.

# Experience

- Jul Sep 2025 **Research internship in LLM security NICT** Security and jailbreak interpretability on reasoning LLMs.
- Mar May 2025 Research internship in AI explanability INRIA
   Verified robust explanation for language models.
- Jul Dec 2024 Research internship in AI security Thales
   Implementations and improvements of state-of-the-art attacks on LLMs.
- 2022 2024 Training and infrastructure HackademINT
   Teaching (cloud and AI security), cloud management (Kubernetes), creation of challenges (AI & quantum physics), and organization of 404CTF 2023 & 2024.

## Misc

- · Languages: Python, French, OCaml, English, Typst, TypeScript, Lua, Rust, C, Bash, Japanese (JLPT 4), Lean
- Tools/ Frameworks: PyTorch, nnsight, Docker (Podman), Kubernetes, React, Qiskit, Archlinux:), (see my GitHub for more)
- Other interests: Piano, guitar, teaching, reading, geopolitics, particle physics:), sports, video game (playing & development), meditation

· Followed ARENA and AISF

# **Papers**

- · Scaling Hybrid Constrined Zonotopes with optimisation Winninger T., Urban C., Wei G., Jun 25. Paper
- Using Mechanistic Interpretability to Craft Adversarial Attacks against Large Language Models -Winninger T., Addad B., Kapusta K., Mar 25. <u>ArXiv</u> / <u>Webpage</u>

## **Talks**

- · Adversarial attacks against reasoning LLMs, Tokyo, NICT, Sep 25.
- · Scaling abstract domains to Large Language Models with Hybrid Constrained Zonotopes, ENS Ulm, INRIA, Jun 25.
- · Mechanistic interpretability for LLM attack and defense, École Polytechnique, CeSIA, Apr 25. Slides
- Introduction to AI security and reverse engineering, Télécom SudParis, HackademINT, Apr 25. <u>Slides</u> / <u>Webpage</u>
- · Model Poisoning, Station F, CeSIA, Jun 24. Slides
- GNN based IDS and its robustness against adversarial attacks, Télécom SudParis, HackademINT, Jun 24.
   Slides
- · Cheating Detection in the 404 CTF, Rendez-vous de la Recherche et de l'Enseignement de la Sécurité des Systèmes d'Information (RESSI), May 24.
- · Introduction to prompt hacking, Télécom SudParis, HackademINT, Nov 23. Slides
- · How to backdoor federated learning, Télécom SudParis, HackademINT, May 23. Slides
- · Introduction to AI & cyber security, Télécom SudParis, HackademINT, May 23. Slides

# Research reports

· Graph Neural Network based Intrusion Detection and its Robustness against Adversarial Attacks, Moreau R., Winninger T., Blanc G., Jun 24. Paper

#### **Posts**

- Subspace Rerouting: Using Mechanistic Interpretability to Craft Adversarial Attacks against Large Language Models. <u>Post</u>
- · Exploring the use of Mechanistic Interpretability to Craft Adversarial Attacks. Post

# **Hackathons**

· ZaMark: Intellectual Property protection with Homomorphic Watermarking, *Privacy Preserving Hackathon, Zama, Sep 24, (finished 2nd)*. Slides
